

TIMOTHY OGHENERO JEHWO

Full-Stack Software Engineer | AI/HealthTech | Network & IT Support Engineer

Abuja, Nigeria | Open to Remote & Relocation Worldwide | timmyroyalty@gmail.com

Portfolio: royalteeportfolio.netlify.app/ | GitHub: github.com/Royal07T | LinkedIn: linkedin.com/in/timothy-jehwo-15b12930a

PROFESSIONAL SUMMARY

Full-Stack Software Engineer and Network/IT Support Engineer with 3+ years of experience building production web applications and supporting IT infrastructure. Strong in Laravel, PHP, Vue.js, React, REST APIs, MySQL, authentication, RBAC, payment integrations, and AI-assisted development. Experienced across HealthTech, FinTech, SaaS, networking, and technical support. Currently developing MedExplain, an AI-powered personal health intelligence platform combining structured health data, medical document analysis, health trends, RAG, AI orchestration, and safety-focused LLM integration.

PROFESSIONAL EXPERIENCE

DoctorOnTap — Full-Stack Software Engineer | HealthTech | Remote | Jul 2025 – Present

- Develop and maintain production features for a telemedicine platform serving patients, doctors, pharmacies, and delivery partners.
- Build secure RESTful APIs supporting appointments, consultations, prescriptions, pharmacy services, and healthcare workflows.
- Implement authentication, authorization, RBAC, and payment gateway integrations.
- Work with MySQL databases, optimize queries, troubleshoot production issues, and improve application stability.
- Collaborate with remote team members on development, debugging, testing, and deployment.
- Use AI-assisted development tools for development, debugging, documentation, and productivity.

Technologies: Laravel, PHP, Vue.js, MySQL, REST APIs, JWT, Git

Xala Premium — Full-Stack Software Engineer | Remote | Nov 2025 – May 2026

- Developed backend APIs and frontend features for a hotel and event booking platform.
- Built booking workflows and customer-facing functionality.
- Refactored existing code, improved performance, and resolved backend/frontend production issues.

Technologies: Laravel, PHP, Vue.js, MySQL, REST APIs

Wired Banking Africa — Backend Software Engineer | FinTech | Hybrid | May 2025 – Dec 2025

- Developed backend services supporting merchant wallets, POS systems, and financial transactions.
- Built APIs for merchant onboarding, authentication, user management, and transaction workflows.
- Implemented validation and security controls for financial operations and optimized backend services.

Technologies: Laravel, PHP, MySQL, REST APIs, React.js, Git

Methic Technology Ltd — Backend Software Engineer | Hybrid | Feb 2025 – May 2025

- Developed backend modules for a loan management platform.
- Built RESTful APIs, integrated payment gateways/webhooks, optimized SQL queries, and resolved production issues.

Technologies: Laravel, PHP, MySQL, REST APIs

Rosa Mystical Academy CBT Centre — Network / IT Support Engineer | Abuja, Nigeria | On-site | Nov 2023 – Present

- Provide technical support for computer systems, network infrastructure, and users.
- Install, configure, troubleshoot, and maintain LAN infrastructure and connected devices.
- Perform LAN cabling, IP configuration, connectivity testing, and Cisco router/switch troubleshooting.
- Diagnose hardware, software, workstation, and network issues and support reliable CBT operations.

SELECTED PROJECTS

MedExplain — AI-Powered Personal Health Intelligence Platform

GitHub: github.com/Royal07T/MedExplain

- Built an AI-powered HealthTech platform for medical document analysis, structured lab-result extraction, health trends, personal health records, health timelines, medication context, and contextual AI assistance.
- Designed an AI architecture using Laravel, FastAPI, Vue.js, structured AI outputs, RAG, multi-agent orchestration, safety controls, and a provider-agnostic LLM Gateway.
- Implemented user-scoped health data handling, deterministic health-data processing, asynchronous AI workflows, and safety-focused educational responses that distinguish facts from AI-generated context.
- Designed the platform to connect medical documents, laboratory observations, medications, and health events into longitudinal personal health intelligence.

Telemedicine Platform — DoctorOnTap

Developed and maintained secure APIs supporting patient management, doctor consultations, appointments, prescriptions, online payments, pharmacy services, and medication delivery.

Merchant Wallet & POS Platform — Wired Banking Africa

Built backend services for merchant onboarding, wallet management, transaction processing, POS operations, reporting, and business workflows.

Hotel & Event Booking Platform — Xala Premium

Developed APIs and booking functionality supporting hotel reservations, event bookings, customer management, and platform operations.

TECHNICAL SKILLS

Software Engineering: PHP, JavaScript, TypeScript, SQL, C | Laravel, REST APIs, MVC, Eloquent ORM, JWT, Laravel Sanctum, RBAC | Vue.js, React, Next.js, Livewire, Blade, HTML5, CSS3, Tailwind CSS, Bootstrap | MySQL, PostgreSQL, Database Design, Query Optimization

AI / Backend: FastAPI, LLM integration, RAG, AI orchestration, structured outputs, AI-assisted development

Payments & APIs: Paystack, Flutterwave, Stripe, Korapay

Tools: Git, GitHub, Linux, Apache, Composer, Postman, ChatGPT, Claude, Cursor, Windsurf

Networking & IT: Cisco Routers/Switches, LAN/WAN, TCP/IP, IP Addressing/Subnetting, Network Troubleshooting, LAN Cabling, Wi-Fi, Windows Administration, Hardware/Software Troubleshooting, Network Security Fundamentals

CCTV: CCTV Installation, IP Cameras, DVR/NVR, Cabling, Remote Monitoring, Camera Configuration, Surveillance Troubleshooting

EDUCATION

University of the People (UoPeople) — Bachelor of Science in Computer Science | Expected 2030

Cisco Networking Academy — Network Engineering / Cisco Networking | 2024

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Cisco Certified Network Associate (CCNA)
- ALX Software Engineering Program
- C Programming Certificate
- W3Schools Web Development Certifications
- Coding Game C Problem Solving
