PROFESSIONAL SUMMARY

Full-Stack Software Engineer and Network/IT Support Engineer with **3+ years of experience** developing production web applications and supporting IT infrastructure. Experienced in Laravel, PHP, Vue.js, React, MySQL, RESTful APIs, authentication, payment integrations, networking, LAN infrastructure, Cisco devices, CCTV installation and configuration. Strong background in troubleshooting, systems support, database management, and building secure and maintainable software. Comfortable working independently and collaboratively across software, networking, and technical support environments.

PROFESSIONAL EXPERIENCE

DoctorOnTap Full-Stack Software Engineer

HealthTech | Remote

Jul 2025 – Present

- Develop and maintain production features for a telemedicine platform serving patients, doctors, pharmacies, and delivery partners.
- Develop secure RESTful APIs supporting appointments, consultations, prescriptions, pharmacy services, and healthcare workflows.
- Implement authentication, authorization, RBAC, and payment gateway integrations.
- Work with MySQL databases and optimize queries and backend operations.
- Troubleshoot production issues and improve application performance and stability.
- Collaborate with remote team members on development, debugging, testing, and deployment.
- Use AI-assisted development tools to improve development, debugging, documentation, and productivity.

Technologies: Laravel, PHP, Vue.js, MySQL, REST APIs, JWT, Git

Xala Premium Full-Stack Software Engineer

Remote

Nov 2025 – May 2026

- Developed backend APIs and frontend features for a hotel and event booking platform.
- Built and maintained booking workflows and customer-facing functionality.
- Refactored existing code and improved application performance.
- Troubleshot production issues across backend and frontend components.
- Collaborated with engineers to deliver new features and platform improvements.

Technologies: Laravel, PHP, Vue.js, MySQL, REST APIs

Wired Banking Africa Backend Software Engineer

FinTech | Hybrid

May 2025 – Dec 2025

- Developed backend services supporting merchant wallets, POS systems, and financial transactions.
- Built RESTful APIs for merchant onboarding, authentication, user management, and transaction workflows.
- Implemented validation and security controls for financial operations.
- Maintained production services and investigated backend issues.
- Worked with relational databases and optimized backend operations.

Technologies: Laravel, PHP, MySQL, REST APIs, React.js, Git

Methic Technology Ltd — Backend Software Engineer

Hybrid

Feb 2025 – May 2025

- Developed backend modules for a loan management platform.
- Built RESTful APIs supporting financial and application workflows.
- Integrated payment gateways and webhook processing.
- Optimized SQL queries and database operations.
- Maintained production backend services and resolved technical issues.

Technologies: Laravel, PHP, MySQL, REST APIs

Rosa Mystical Academy CBT Centre — Network / IT Support Engineer

Abuja, Nigeria | On-site

Nov 2023 – Present

- Provide day-to-day technical support for computer systems, network infrastructure, and users.
- Install, configure, troubleshoot, and maintain LAN infrastructure and connected devices.
- Perform **LAN cabling, network troubleshooting, IP configuration, and connectivity testing**.
- Configure and troubleshoot **Cisco switches and routers**.
- Diagnose hardware, software, connectivity, and workstation-related issues.
- Support computer systems used for CBT and other organizational operations.
- Assist with network security, device configuration, and infrastructure maintenance.
- Troubleshoot network connectivity and resolve technical issues to maintain reliable operations.

Technologies: Cisco Networking, LAN/WAN, TCP/IP, IP Addressing, Routers, Switches, LAN Cabling, Windows, Ubuntu, IT Support, Hardware, Microsoft 360

CCTV & SECURITY SYSTEMS EXPERIENCE

CCTV Installation & Configuration

- Install and configure **CCTV surveillance systems** for residential and commercial environments.
- Configure CCTV cameras, DVR/NVR systems, storage, and monitoring equipment.
- Perform camera positioning, cabling, power connections, and system testing.
- Configure remote CCTV viewing and network connectivity supported.
- Troubleshoot camera connectivity, video transmission, recording, and network-related issues.
- Perform CCTV system maintenance, fault diagnosis, and configuration.
- Combine networking knowledge with CCTV installations to troubleshoot IP-based surveillance systems.

Skills: CCTV Installation, IP Cameras, DVR/NVR, Surveillance Systems, Network Configuration, Cabling, Remote Monitoring, Troubleshooting

TECHNICAL SKILLS

Software Engineering

Languages: PHP, JavaScript, TypeScript, SQL, C

Backend: Laravel, REST APIs, MVC, Eloquent ORM, JWT, Laravel Sanctum, RBAC

Frontend: Vue.js, React, Next.js, Livewire, Blade, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: MySQL, Database Design, SQL, Query Optimization, Postgres

Payments & APIs: Paystack, Flutterwave, Stripe, Korapay

Tools: Git, GitHub, Linux, Apache, Composer, Postman

AI Development Tools: ChatGPT, Claude, Cursor, Windsurf

Networking & IT

- Cisco Routers & Switches
- LAN/WAN
- TCP/IP
- IP Addressing & Subnetting
- Network Troubleshooting
- LAN Cabling
- Router & Switch Configuration
- Wi-Fi Configuration
- Computer Hardware & Software Troubleshooting
- Windows Administration
- Network Security Fundamentals

CCTV & Security Systems

- CCTV Installation
- IP Cameras
- DVR/NVR Configuration
- CCTV Cabling
- Remote CCTV Monitoring
- Camera Configuration
- Surveillance System Troubleshooting
- Network-based CCTV Systems

EDUCATION

University of the People

Bachelor of Science in Computer Science

Expected 2030

Cisco Networking Academy

Network Engineering / Cisco Networking
2024

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Cisco Certified Network Associate (CCNA)
- C Programming Certificate
- ALX Software Engineering Program
- W3Schools Web Development Certifications

SELECTED PROJECTS

Telemedicine Platform — DoctorOnTap

Developed and maintained secure APIs and application functionality supporting patient management, doctor consultations, appointments, prescriptions, online payments, pharmacy services, and medication delivery.

Merchant Wallet & POS Platform — Wired Banking Africa

Built backend services supporting merchant onboarding, wallet management, transaction processing, POS operations, reporting, and business workflows.

Hotel & Event Booking Platform — Xala Premium

Developed backend APIs and booking functionality supporting hotel reservations, event bookings, customer management, and platform operations.

Tools: Git, GitHub, Linux, Apache, Composer,
Postman AI Tools: ChatGPT, Claude, Cursor,
Windsurf
